

DJ EXTRA

DJ EXTRA

■ SPECIFICATIONS

Jet printing technology: Tlj2.5 thermal foaming technology

Screen size: 10-inch capacitive screen (1024*600 resolution)

Printing speed: 300DPI up to 100 meters per minute

Nozzle management: Freely switch between half-inch print head and one-inch print head

Printing height: 1-25.4mm

Input: 230+ languages can be added

Counter: Length, step, repeat, start value, end value

Graphic code: Code128、EAN8、EAN13、EAN128、QR、GS1
(continue to improve)

Date management: Multiple date format settings

Support language: 16 languages such as Chinese, English, Korean, Spanish, Japanese, French, German, Italian (you can add any language)

Transcode management: Support graphics code, text transformation

Interface management:

Ethernet interface*1, USB interface*1

M12-3 core *1 (external electric eye), M12-4 core *1 (encoder)

M12-5 core *1 (alarm light), M12-6 core *1 (upper computer/lower computer)

M16-3 core*1 (power supply), M16-24 core*4 (sprinkler)

Installation method: Side spray, down spray, gantry support

Ink volume management: Automatic display and display

Power: Input:100-240V ; Output: 32V, 5A

■ MAIN ADVANTAGES

01 Intelligence

Embedded intelligent operating system
Support u disk import database printing
Support external real-time variable database printing

03 Portable

Separate design, support splicing, easy to install, with fine adjustment device

05 Industrial design

High definition touch screen, anti-interference, beautiful metal body

02 Cost effective

Original imported printing engine, low cost, high quality jet printing effect. With all kinds of original imported ink, it is suitable for various materials and fields of jet printing

04 Stable

New metal body, good heat dissipation, suitable for long-time work

06 Save worry

Easy to operate, zero maintenance. 1 year warranty
